SIW005 - Computer Graphics & Visualisation (2019/2020)

Exercises

Map some buildings at UJI with:

- Markers
- Polygons
- GeoJSON
  - Add an event in such a way that when a user moves over a geometry it shows what building it is.
- By using the OpenSky API, create a leaflet map with the realtime plugin that shows the flights positions every 10 seconds.
  - https://gist.github.com/devdattaT/41aa886a74c904671b2c26a2c0c0a959
